

# Interior Design Services

Interior Design is an important component of Haley Ward's Building Services. Our interiors service is versatile and tailored to each client. We focus on creating appealing, functional, and cohesive interior spaces, for various building types. We collaborate with clients to develop interior layouts, select finishes, furniture, fixtures, and equipment, while considering factors like aesthetics, ergonomics, spatial organization, and user experience.

During programming, we work closely with our clients to identify their desires and budget constraints to create a functional layout that works for their needs. Our Interior Designers help clients visualize their space through finish presentations and renderings while communicating effectively the design intent with team members. Our team understands that coordination between owners, architects, engineers, construction personnel, and vendors is critical to move the project forward successfully.

Experience includes, but not limited to:

- Multi-family
- Hospitality
- Restaurants
- Commercial Offices
- Education: K-12 & Higher Ed
- Retail
- Civic & Government
- Residential

**Interior design services include, but not limited to:**

- Programming & Space Planning
- Concept Imagery
- Interior Finish Selections
- Lighting, Hardware & Fixture Selections
- Design Presentations
- Renderings
- Construction Documentation
- Interior Specifications
- Construction Administration & Project Management
- Coordinating Furniture Selections & Installation

By incorporating interior design services into your project, the building's interior spaces can be optimized for their intended purpose, creating a pleasant and functional environment for occupants.

**Private Residence**
