Project Description	The project consists of known and unknown mainline and lateral sewer rehabilitation using various rehabilitation methods, including, but not limited to, full length cured-in-place liners, pipe joint and service lateral test and seal methods, excavated point repairs and sewer replacement, and cured-in-place liner point repairs; and known and unknown sewer manhole rehabilitation using various rehabilitation methods, including but not limited to chemical grout sealing of active leaks, repairs of manhole structures, manhole lining, frame and cover repairs/replacement, and inflow frame inserts. The project also includes sewer main cleaning and CCTV inspection in all sewers to be rehabilitated, and where directed by the owner.
Special Requirements	The Successful Bidder shall perform the sewer main and manhole rehabilitation work under a three (3) year Contract based upon an annual appropriation of funds and written authorization by the Owner. It is possible that all or a portion of the “unknown” work will be eliminated by the Owner.
